

# Lithizen Software

-Developing Business to Business Software-

We take pride in developing fast and efficient products. Our developers work hard on there products.

We come up with new un-seen innovated technology that will help your company prosper.

Our products work effciently on all to most devices. Our job is to make user accessibilty easier.

This Company was founded by James Singewald and Lukas Hulbert. They are two young entrepreneurs who work hard at developing high quality products. These devs are working hard to create products you will love. They are currently developing their first product. Check us out at [www.lithizen.com](http://www.lithizen.com)! There you will find new updates about the software and the ability to get in touch with the developers. They will be active on the website and posting new updates and information, Be sure to follow us on Twitter @lithizen .
